EXPERIENCE

Software Engineer

Allianz Life | Golden Valley, MN | October 2017–Present

- Creating and maintaining multiple component libraries for Allianz properties using React, Pattern Lab, and SCSS.
- Establishing development and accessibility standards for the component library.
- Developing consumer and business calculators using React and Mobx.

Software Engineer

RAZR Marketing | Minnetonka, MN | September 2016–August 2017

- Built Angular component library for RAZR developers to streamline development processes.
- Lead front end development for templating US Bank's rewards site using Angular and PHP.
- Maintained code quality by writing unit tests with Jasmine and Karma to prevent code defects.

Front End Design Intern

SportsEngine | Minneapolis, MN | May 2016–August 2016

- Developed and updated clients sites through SportsEngine's CMS.
- Produced a fully custom site template for West Austin Youth Association (WAYA).
- Collaborated with a small team to creatively solve problems on a complex code base.

Student Web Developer

Prime Digital Academy | Minneapolis, MN | December 2015–March 2016

- Personal Project: Paw Finder
 - Improved the animal adoption process with masonry-style interface to browse pets quickly.
- Group Project: Equipment manager application for SportsEngine
 - Developed front-end and designed application using SportsEngine's platform style guide.
